

Case Study

User: Zwei Architects
 Interior Design + Architecture Firm
 Project: Adelaide Airport Terminal Expansion

ZWEI (Interiors Architecture)

Zwei joined TCPinpoint by being invited on to the platform by the Tenancy Coordinator as part of Stage 1 of the Adelaide Airport Terminal Expansion project.

Zwei indicated that TCPinpoint enabled the team to communicate together across the build either as conversations or for formal design submissions. They believed that the software allowed them to work to a common calendar and align them on the delivery of the tenancies they were working on.

Zwei believes that TCPinpoint is simple to use and the customer support is excellent.

Desired Outcome achieved:

- Transparency
- Collaboration
- Clarity of schedule
